AI tooling
Claude Code, Codex, Cursor, OpenAI API, automated AI code review

LANGUAGES

Serbian: native · English: professional

Branka Lakićević

Senior Frontend / Full-stack Engineer · Development Lead

React · TypeScript · Next.js · Shopify · Node.js · AI-assisted engineering

Frontend-first full-stack engineer and development lead with 4+ years at COI Agency and earlier freelance Shopify work. I lead a team of up to 9 developers shipping 20+ storefronts and apps a year, and I introduced AI-assisted code review and automation across the team. Side project: Lunara, a Next.js / React / Supabase / OpenAI product with live payments.

EDUCATION & CREDENTIALS

Bachelor's degree, Information Systems and Technologies

University of Belgrade · Faculty of Organizational Sciences

Credentials: Solution Planning Fundamentals (Shopify 2026) · Shopify Development Fundamentals (Shopify 2026) · JavaScript (Udemy 2022)

EXPERIENCE

Lead Developer — Feb 2023 to present

COI Agency / Local Development · Zagreb

- Lead a team of 2 to 9 developers shipping 20+ custom Shopify storefronts and apps a year; own technical decisions, code quality and delivery.
- Introduced AI-assisted engineering across the team: Cursor/Claude coding standards, an automated PR review pipeline on GitHub Actions and Claude Code / Codex agents for implementation and review.
- PRINTWORKS: led the complete Shopify theme build, then a photo-printing platform with in-browser editor, order webhooks, BullMQ/Redis processing and automated print-lab handoff (Node.js, Express, Sharp).
- Build custom Shopify themes from scratch to supplied designs and the apps behind them (CDLP, Wall of Art, IVON…): backorder and B2B flows, admin extensions in React Router 7 and Preact, Prisma/PostgreSQL, webhooks, ERP and Klaviyo integrations…
- VIBE Search: owned the full frontend of an AI product-search app (Remix, React, TypeScript, Polaris) and its storefront widget; integrated the backend API and was accountable for delivery.
- Interview and onboard developers, present solutions and demos to clients, and join COI management discussions.

Frontend Developer — Sep 2022 to Jan 2023

Local Development / COI Agency · Zagreb · Remote

Performance-focused Shopify storefronts in Liquid, vanilla JavaScript, Web Components and CSS. Promoted to Lead Developer after five months.

Freelance Web Developer — Before 2022

Upwork · Shopify stores and websites for small businesses, while studying

PERSONAL PROJECT

Lunara · AI entertainment web app, built solo, in production — Apr 2026 to present

Personalised AI content and streaming chat (OpenAI API), subscriptions and one-off purchases via Gumroad webhooks, guest checkout with email delivery, Supabase with RLS, i18n in 9 locales. 38 pages, 20 API routes, deployed on Vercel.

Stack: Next.js 16 · React 19 · TypeScript · Tailwind CSS 4 · Supabase · OpenAI API · Gumroad · Resend · PostHog · Vercel
